Double Seal Valve Extension

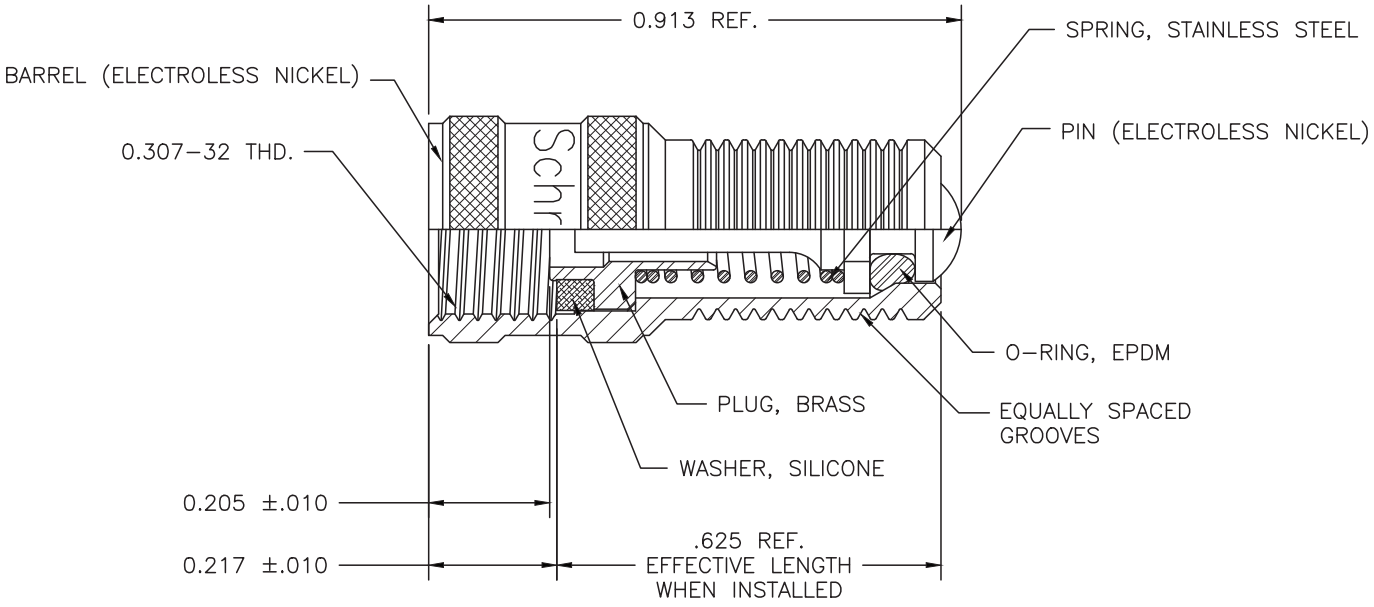
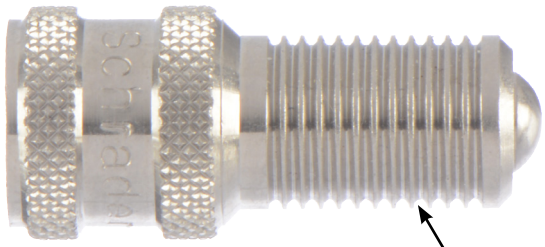
This cap free, double seal valve extension, (part# 010460250) provides a seal against the elements without a cap, allowing better access than a bare stem, especially handy with specialty hub caps or when used with wheels allowing limited access to valve. The extension fits regular cap threads (.305" -32) at valve mouth. Maximum operating pressure, 150 psi. Made in the USA.





Equally spaced grooves provide best connection to inflator chuck
